

Finding Your Modem's Satellite IP Address

1. Open the web browser on any computer connected to the TracPhone® system and enter the following web address: **http://192.168.0.1**.
2. Enter the following user name and password:
 - User name: **KVH** (all caps)
 - Password: Leave blank
3. At the System Status page, select **Click here for detailed modem status**.
4. Find the **Modem Satellite IP** at the top of the Detailed Modem Status page.
